# EdgeSounds Electric Piano Sound Sample Library Released

Brooklyn, NY, USA, July 11, 2011

EdgeSounds has announced the release of the Electric Piano, a 2-DVD-ROM sound sample library for NI KONTAKT and GIGA Studio.

Recognizing the excessive importance of the electric piano sound for the contemporary music, the EdgeSounds Electric Piano Sound Sample Library provides an essential collection of electric piano samples vital for the modern music production. The library realistically recreates distinctive sound of 9 different instruments, ranged from classic Rhodes Piano models to Wurlitzer, carefully recorded employing the best studio practices resulting in 8.4 GB of studio quality sample material. Each key of an instrument was sampled individually with 5 velocity layers for greater authenticity. EdgeSounds Electric Piano provides all necessary means to recreate the characteristic EP sound in all its details.

Electric Piano features 3285, 24 Bit 96 KHz linear samples totaling the 8.4 GB of sample data, which comprise the 9 performance programs, and is available for NI KONTAKT 2.2 or later, GIGA Studio 3 and compatible instruments.

EdgeSounds Electric Piano is now available for a suggested price of US$ 144.95 from authorized dealers and in the EdgeSounds Online Shop.
